ABOUT THE EVENT

Magnus Group is ecstatic to announce and welcome you to its “2nd Edition of International Congress on Clinical Immunology and Allergy” (ICIA 2023) which is going to be held virtually during October 23-25, 2023 in Boston, USA.

The global summit will be focused on the theme “*Understanding Allergies and Boosting Immunity through Novel Research.*”

ICIA2023 is the finest place to expand one’s scientific knowledge by sharing it through oral and poster presentations and to form a strong network with eminent people, key decision makers from academic institutions, healthcare institutes, immunological societies, the vaccine industry, and biotech organizations from all over the world.

The conference intends to instill a strong belief that by integrating immunology and its characteristics with other health and medical sciences, all other health and medical sciences can provide healthy circumstances. There are numerous opportunities to get involved with the researchers, scientists, clinicians, academicians, biotechnologists, pharmacists, immunologists, allergy specialists, industry delegates, and individuals sharing an interest in immunology to contribute to the goal of promoting and supporting excellence in immunology research, and clinical practice for the benefit of animal and human health and welfare. Plenary talks, symposia, keynote sessions, as well as several collaborative events will “open doors” to develop professional bonds with related societies.

We sincerely hope you will join us at ICIA 2023 “opening doors to the world of clinical immunology and allergies” and welcome colleagues from all over the world by assisting us in bringing the premier event for the global community to fruition, making it your go-to meeting in 2023.
